## Spring Home Maintenance Checklist

---

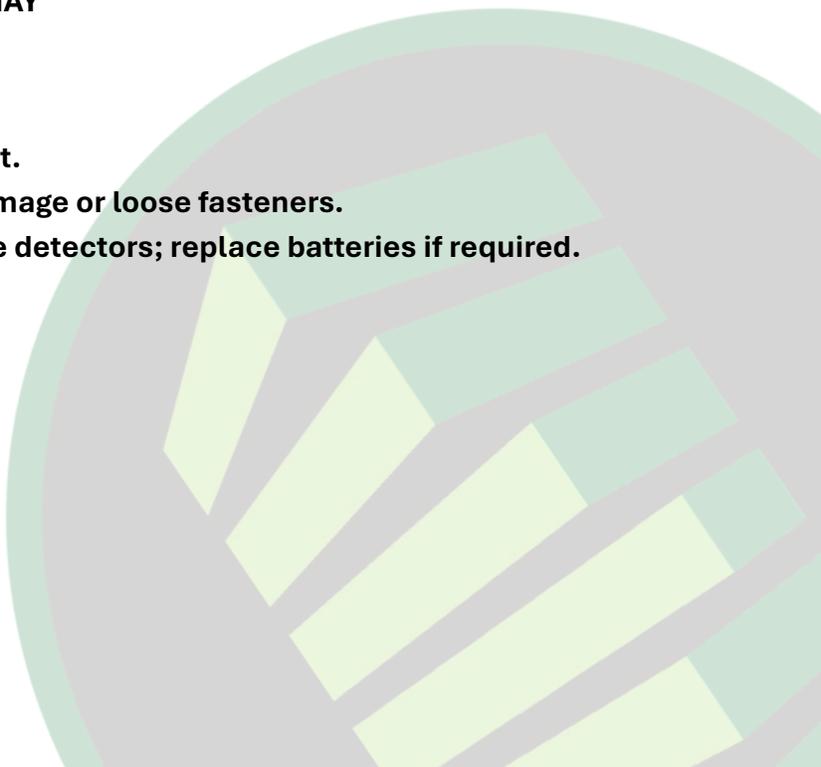

### MARCH

- Inspect roof from ground level for missing or damaged shingles.
  - Check basement and foundation for signs of water intrusion.
  - Inspect sump pump and test operation.
  - Replace furnace filter as required.
  - Test smoke alarms and carbon monoxide detectors; replace batteries if required.
- 

### APRIL

- Remove covers from air conditioning unit and inspect condition.
  - Schedule air conditioner service as required.
  - Check exterior caulking around windows, doors, and penetrations.
  - Inspect exterior hose bibs for leaks and turn on water supply.
  - Clean eavestroughs and downspouts if required.
  - Test ground fault circuit interrupter (GFCI) outlets (interior and exterior).
- 

### MAY

- Clean HRV filters if applicable.
  - Inspect and clean range hood filter.
  - Clear lint from clothes dryer exterior vent.
  - Inspect decks, railings, and stairs for damage or loose fasteners.
  - Test smoke alarms and carbon monoxide detectors; replace batteries if required.
- 
- A large, semi-circular decorative graphic in the bottom right corner of the page. It features a stylized house or building shape composed of various shades of green and yellow, set against a light gray background.
